Cognia™

Dear Stephen, I hope this email finds you well.

Thank you for submitting your PAR with the appropriate links. Upon review of the submitted PAR and the school's being awarded a "Completed" status, the school will then no longer have need to complete another PAR. Instead, as it continues with its ongoing improvement journey, it will then **employ AdvancED's eProve Strategies Module**. The use of this new protocol is no longer tied to a specific period of two years, but should instead be ongoing throughout any given school year. This modular diagnostic improvement software platform is already available in the AdvancED dashboard support tools. It will provide a more hands-on school improvement participation providing opportunity for the school to leverage its own data to inform improvement strategies in its continued ongoing school improvement journey.

Information about how to employ the eProve Strategies Module has already been shared with all schools in previous communication but feel free to reach out to us for additional orientation and support in using this eProve tool. It is also suggested you or someone else from the school might consider attending the Latin American Conference that will take place in Atlanta, GA, December 2 - 5, 2019 (see attached). I will be pleased to greet you in person.

Accept our thanks for your follow-up response efforts and feel free to reach out to us if you have any questions.

Always,

Jose Rivera, Ed.D. | International Director, Latin America
